

## Unique Brother Features

Brother's FAX-335MCS is the direct thermal facsimile that lets you stay on top of things with a built-in Answering Machine that allows up to 15 minutes of recording for your incoming messages. FAX-335MCS can store up to 20 pages\*\* of page memory with its 512KB memory to assure you of continuous reception!

FAX-335MCS has a Key Lock System that prohibits receiving faxes or answering calls, unless a 4-digit password is activated. This prevents unauthorised access to the fax machine. Furthermore, junk faxes and calls can be screened out with the handy Anti-Junk Function\* that prevents paper wastage, by saving only authorised numbers in the station's memory. For more storage of numbers, up to 100 speed-dial locations can be saved!

With FAX-335MCS, document clarity can be improved with the "Smoothing" Enhanced Image Resolution, which softens jagged edges around text. FAX-335MCS is also equipped with an Anti-Curl System (ACS) that flattens paper and prevents it from curling. Another handy tool is the Call Back Message – this allows you to leave a message for the other party to return your call, after sending a fax.

With so many nifty features, Brother's FAX-335MCS is the intelligent facsimile with your personal Message Centre.

## Specifications
